The spring rewind hose reels are easy to install and ensure fast and safe transfer of fluids. The ratchet design allows easy extraction of required hose length.

Painted hose reels

- The hose reels are equipped with a universal hose stop; those with hose are provided with a 2' inlet hose.
- All models are double arm to add stability and long life.

Manual rewinding hose reels are an easy and practical way to manage flexible hoses. Operation is extremely simple and needs.

S. 500 hose reels in painted steel with security system

Width 9.5" - 13" - 18" - 23.5

TECHNICAL CHARACTERISTICS

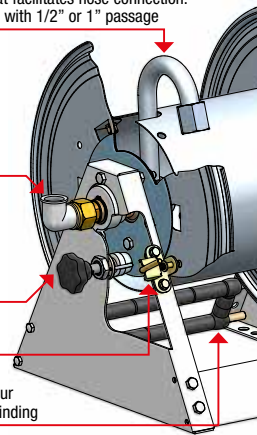

Practical elbow union that facilitates hose connection. Available in two versions with 1/2" or 1" passage

Swivel joints suitable for various pressures and with total passage. Available in brass galvanised steel and AISI 304 stainless steel

Clutch in POM to regulate hose unwinding and prevent the drum from turning empty due to inertia

Parking lock

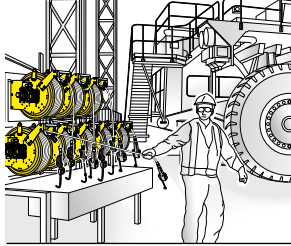

Large hose guide to favour hose unwinding and rewinding

The motorized hose reels are indispensable for applications involving heavy duty equipment with a hose rewinding system more powerful than that of the automatic spring rewinding.

Motorized hydraulic and air-operated hose reels

- The hose reels are equipped with hose are provided with a 2" inlet hose.
- Direct drive - no chains or belts.

Series 637 - 617

ADVANCED FLUID MANAGEMENT SOLUTIONS

technology, efficiency, reliability

The starting point for the entire manufacturing cycle is the research and development of cutting-edge solutions for products fully made in Italy.

One of our most important target is to offer high level of quality. Rigorous tests follow every single phase of the manufacturing process.

RAASM offers the most complete range of fluid management solutions suitable for many sectors. Our success is founded upon our ability to identify and fulfill specific customers' requirements.
